**Software Development**

# Software Development

## Overview

Every business has unique challenges that off-the-shelf software can't always solve. That's where custom development comes in.

InfraTeam designs and develops **custom software solutions** to automate workflows, improve efficiency, and reduce costs. From small business tools to enterprise-grade applications, we help you **turn ideas into working solutions**.

## Services We Provide

### Custom Application Development

- Desktop applications (Windows & cross-platform)
- Web-based applications (portals, dashboards, CRMs)
- Mobile apps (Android & iOS)
- Cloud-native applications (Azure, AWS, GCP)
- API integrations (payment gateways, 3rd-party systems)

### Workflow Automation

- Automating repetitive business processes
- Integrating software across departments
- Digital forms & approval workflows
- RPA (Robotic Process Automation) solutions

### Database Solutions

- Database design & optimization
- SQL Server, MySQL, PostgreSQL solutions
- Data migration & reporting dashboards

### Business Systems

- Inventory & stock management systems
- HR & payroll solutions
- Customer Relationship Management (CRM)
- Point of Sale (POS) solutions

### Ongoing Support & Maintenance

- Bug fixing & updates
- Feature enhancements
- Security patching
- Long-term software support contracts

## Benefits of Custom Software with InfraTeam

**Tailored to your needs**  
**Scalable**  
**Efficiency**  
**Competitive edge**  
**Support**

Built for your exact business processes.  
Grows with your business.  
Automates repetitive tasks, saving time & money.  
Unique tools your competitors don't have.  
We maintain and update your system.

### Pros & Cons of Custom Software

#### Pros

Built for your exact requirements  
Scalable and flexible  
Improves efficiency and automation  
No unnecessary features

#### Cons

Higher upfront cost  
Development time (weeks to months)  
Requires clear requirements  
Ongoing support may be needed

### Pricing Models

- Pay-As-You-Go: **R690**/hour (remote), **R1035**/hour (onsite).
- Small Business Tools (single function apps): from **R11 350 once-off**
- Web Applications (dashboards): from **R28 750 once-off**
- Mobile Applications (iOS/Android): from **R46 000 once-off**
- Custom Application Development: priced according functionality
- Maintenance & Support: from **R2 875/month**

Note: All prices are VAT inclusive

### Frequently Asked Questions (FAQs)

#### How long does custom software take to build?

Small apps: 2–4 weeks. Web apps: 6–12 weeks. Mobile apps: 3–6 months.

#### Do you provide source code?

Yes, clients receive ownership of source code (unless agreed otherwise).

#### What technologies do you use?

.NET, C#, Python, PHP, JavaScript frameworks, SQL databases, cloud platforms (Azure, AWS, GCP).

#### Can software integrate with my existing systems?

Yes, we build APIs and connectors for integration.

#### Do you provide training?

Yes, user training is included in every deployment.

Thank You. 😊

Custom Solutions That Power Efficiency and Growth.”
